PREMIUM LIVE GREEN WALL SOLUTIONS

DESIGN • FABRICATION • INSTALLATION

Bring natural freshness, elegance, and a premium green ambience into your interiors with professionally designed Live Green Wall Solutions by Al Falaj Gardens Agricultural Materials Trading LLC, UAQ, UAE.

Our live green walls are custom-built with healthy indoor plants, self-watering modular twin pots, concealed irrigation, grow lights, and elegant structural finishing — creating a beautiful natural feature wall for modern spaces.

IDEAL FOR: Offices, schools, universities, hotels, restaurants, cafés, showrooms, receptions, and indoor feature walls.

WHY LIVE GREEN WALLS?

A Natural Feature Wall That Elevates Any Interior

A live green wall is more than decoration. It adds life, freshness, and a premium natural atmosphere to your indoor space.

Perfect for creating a calm, welcoming, and professional environment, our green walls are designed to blend beautifully with modern interior themes while supporting healthy plant growth.

**NATURAL BEAUTY.
LASTING IMPACT.**

KEY BENEFITS

Enhances interior beauty and ambience

Creates a fresh and relaxing environment

Suitable for corporate and hospitality spaces

Custom-designed as per wall size and theme

Professionally installed with neat finishing

SYSTEM & STRUCTURE

**Strong Structure. Elegant Finish.
Professional Look.**

Our live green wall system is fabricated using durable 30/40 mm aluminium alloy extrusion profiles for long-lasting strength and clean alignment.

The exterior side walls and irrigation tank cabin can be finished with acrylic sheet or melamine wooden decorative sheets, giving the green wall a refined interior-design appearance.

**BUILT FOR DURABILITY.
DESIGNED FOR ELEGANCE.**

STRUCTURAL HIGHLIGHTS

Aluminium alloy frame structure

Decorative acrylic or melamine side finishing

Waterproof painted board backing

PVC liner sheet for water protection

Concealed system layout for a neat finish

SELF-WATERING MODULAR POT SYSTEM

Healthy Roots. Better Moisture. Dense Green Coverage.

PLANT DENSITY

Minimum 58 plants per SQM of net green wall area for a lush, full, and premium green appearance.

Our planting system uses green wall modular twin pots fixed on a waterproof protected backing board.

Each pot maintains a minimum water holding level of 10 mm, helping the root zone stay moist through the natural capillary action principle.

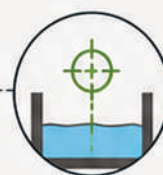

Plants are placed in breathable non-woven felt cloth pots of 10 cm diameter x 12 cm height, allowing good aeration and healthy root development.

MODULAR TWIN POT SYSTEM

Engineered for optimal moisture retention and healthy root growth through natural capillary action.

Minimum **10 mm** water holding level

SYSTEM HIGHLIGHTS

Green wall modular twin pots

Waterproof protected backing board

Minimum 10 mm water holding level

Capillary action moisture support

Breathable non-woven felt cloth pots

10 cm diameter x 12 cm height

Healthy aeration and strong root development
